“Your aim to calm any apprehensive feelings surrounding the clinical assessment was effective because of your natural and relaxed approach to proceedings”

“The assessment was very thorough. It made me realize many thing about myself and what I need to do on my journey to the permanent diaconate-thank you”

“It was very strange to find professional people who knew how to relax you and to extract so much information from you without making you feel judged or worse off - it was my first experience of being subjected to such scrutiny, however, at the end of it all I felt more at home and trusting that I need not worry for sharing so much of my life with people I have just met for a few days-I am very grateful”
